# What is Automedic

---

## **Automedic is a complete hospital & clinic management software**

which helps automate hospitals and clinics as well as patients to be able to book online appointments, get digital prescriptions and view complete history of their visits. We created Automedic because we felt lack of interest towards digitalization in the healthcare industry. Our aim is to minimize the gap between patients & doctors & provide transparency to patients as well as hospital owners.

## **WHO WE ARE**

We are a company that have grown as a big brand digital solution business. We love what we do & we want to build a significant business. We are We Starter.

We Starter started as a web designing & Development agency and as the time pass, our company started to grow and we introduced new services in the market with our unique specialties. Our main focus is to provide one-stop solution to all of our clients and reduce their work load. We have grown big over the past years and have managed to satisfy hundreds of clients with our 25+ online services.

A Product of

# In Patient Department (IPD)

Complete patient, admission & operation management. Add additional services to admitted patients, take partial payments, manage patients & beds and discharge with advance billing invoice. Ability to give discount even after the admission.

- In-Patient & Emergency/Day Care
- Billing, Addons & Invoices
- Reports

# Out Patient Department (OPD)

Ability to get appointments directly via web or book directly from the reception desk. Our powerful API helps you connect your website with the software. Smart OPD token system with automatic assignment. Ability to generate tokens in advance bookings.

- Display doctors schedule directly on your web
- Get appointments according to the schedule
- Automated email & SMS to patients on successful booking
- Smart token management

# Emergency Daycare

Manage emergency department with quick patient admission apply services to patient and apply bed charges after a certain number of hours. Give additional discounts to patients.

- Add or manage ER or day care services
- Charge for bed in ER after a certain number of hours
